CAREER
OBJECTIVE

Dynamic Junior MERN Stack Web Developer with project experience in full-stack applications from concept to deployment. Strong frontend and backend skills, along with a solid understanding of UI/UX design, enable the delivery of engaging user experiences. Proven communication and problem-solving abilities from a customer service background support effective collaboration in fast-paced environments. Eager to apply a passion for technology and commitment to excellence in creating innovative web solutions.

BACKEND DEVELOPMENT DATABASE MVC STATE MANAGEMENT

QUALIFICATION

MATRIC	INTERMEDIATE	TWO YEARS IT DIPLOMA
2017-2019	2020-2022	2023-2025

WORKING & LEARNING
EXPERIENCE

I am a passionate Junior MERN Stack Web Developer skilled in building full-stack web applications. With experience in both frontend and backend development and a solid grasp of UI/UX design principles, I transitioned from a successful customer service career, enhancing my communication and problem-solving skills.

From 2019 to 2023, I worked in outbound call centers, which improved my adaptability and collaboration in fast-paced environments. My web development projects include:

- A Blog Web Application using Context API for the Blog Posting
- An E-commerce project, currently integrating backend for a full MERN stack
- A MyAirbnb clone with host/guest functionalities, soon to be deployed.

I aim to undertake a large-scale MERN project featuring an Admin Panel, Redux for state management, JWT authentication, payment gateway integration, and more.
